SUMMER

INSTITUTE

Engaging Students in Civic Science and Action

VIRTUAL

JULY 19-21, 26-28

2:00 - 4:30pm ET

This **6-day (15 hours) online** institute will introduce [CELf's Inquiry to Action Framework](#) within the context of your classroom. Participants will learn the skills and knowledge to develop a project to engage student learning through inquiry, place and action. Pathways to topics such as water, biodiversity and air will be explored. Teachers will walk away with an Inquiry to Action project planner ready to implement in the fall.

VIRTUAL PROFESSIONAL LEARNING FOR 5-12 EDUCATORS

Takeaways:

- Develop a school community project aligned to CELf's Inquiry to Action Framework
- Connect to a **community of educators** passionate about environmental literacy & justice
- Engage your students in **civic science and action**
- Gain access to CELf's **toolkit of resources**

"This program gave me wonderful ideas and examples for how to engage students and their community in these important concepts! I have been wanting to develop ways to integrate civic science into our gardening club and within my lessons, and these virtual sessions were loaded with great information."
