

# Civic Science USA: Engaging Students in Community Projects

## Civic Science for Climate Action

CELF's Civic Science program nurtures critical thinking and civic readiness by engaging students in inquiries for hands-on learning about local sustainability and environmental justice issues they care about. This interdisciplinary program offers flexible opportunities to receive support from CELF educators and peers on your development and implementation of a place- and project-based unit.

**Register Now**

All content area teachers welcome!

Supports the NY Seal of Civic Readiness Capstone Projects!

### Program Highlights

- Collaborate with peers from around the country
- Ignite inquiry & civic action in your community
- Access digital resources to support pathways of study
- Present at CELF's Spring 2024 Student Symposium, engaging with local stakeholders and decision-makers

Participants are eligible for **microgrants of up to \$500** to fund field trips, supplies and/or research tools. **Stipends** will be available upon program completion.
